

Schedule a FREE virtual screening for your high school students!

YOUTH v GOV

This inspiring documentary follows the path of a Federal lawsuit, filed in 2015 by a group of young citizens who claim that the U.S. government violated their constitutional rights to life, liberty, personal safety, and a clean environment through willful actions that contributed to the climate crisis.

Teen Screen will facilitate the virtual screening and discussion and provide a study guide for supplemental learning, created by the filmmaking team. Presented in partnership with the Pennsylvania Bar Association, PBA lawyers and judges will visit your classroom after the screening to offer insight into the legal process of this case and describe the complex relationships that exist between our three branches of government.

Teen Screen is a free educational film program for students and teachers.
